## Aluminium Composite Panel

ACM

Optima+ ACM is a composite material made from aluminium and polyethylene. With its high rigidity, lightweight characteristics and exceptional flatness, this product is a versatile decorative material used in major industries globally including: advertising boards, signage, barriers and construction cladding. It offers ease of installation and fabrication, excellent flatness and easy maintenance. It can be easily formed, is eco-friendly and demonstrates exceptional UV resistance. It comes with a uniform coating and is available in a wide range of colours.

### Typical Composition

### ACM Specifications
