Tenopex® Technical Data Sheet Packaging Films - GAG

Description and Applications

Tenopex's GAG is a co-extruded film with middle layer of APET and outer layers of PETG. It is highly transparent with excellent mechanical and thermoforming properties. GAG provides the advantages of PETG such as printability without pre-treatment, sealing with high frequencies or adhesive. GAG films and sheets are widely used for packaging of electronics, cosmetics, toys, medical equipment, stationery and gifts. They can also be used for signage and graphics applications such as labels, signs and cards. Tenopex GAG is available in thicknesses ranging from 0.3mm-1.5mm.
